DESCRIPTORS: *Topology, Transformations (Mathematics), Integral equations, Trajectories, Applied mathematics, Theory, *Control systems.

Considered are questions concerned with the evaluation of dynamical systems which are subject to choice of the system at each time. Problems such as these arise when we consider control of dynamical systems or dynamical systems subject to unknown disturbances. General results are achieved in this paper concerning the axiomic treatment of such systems. (Author)

The meniscus in the narrower tube fell lower with respect to the liquid level outside the tubes than in the wider one. In this case, the isoamyl alcohol behaves like mercury which is non-wetting with respect to glass. Equations were derived

DESCRIPTORS: Physiology, *Fungi, Plants (Botany), *Trees, Growth, Mycology.

The study that has been carried out makes it possible to draw the following generalized conclusion. /An oak (tree), under definite conditions of cultivation, can grow fairly well without the formation of mycorhiza. However, under the same conditions, the presence, in it, of mycorhiza, enhances its possibilities of utilizing nutritive substances in the soil and water, increases its vital activity and, in the long run, leads to an intensification of growth.
